

# Pressure-Temperature Nomograph

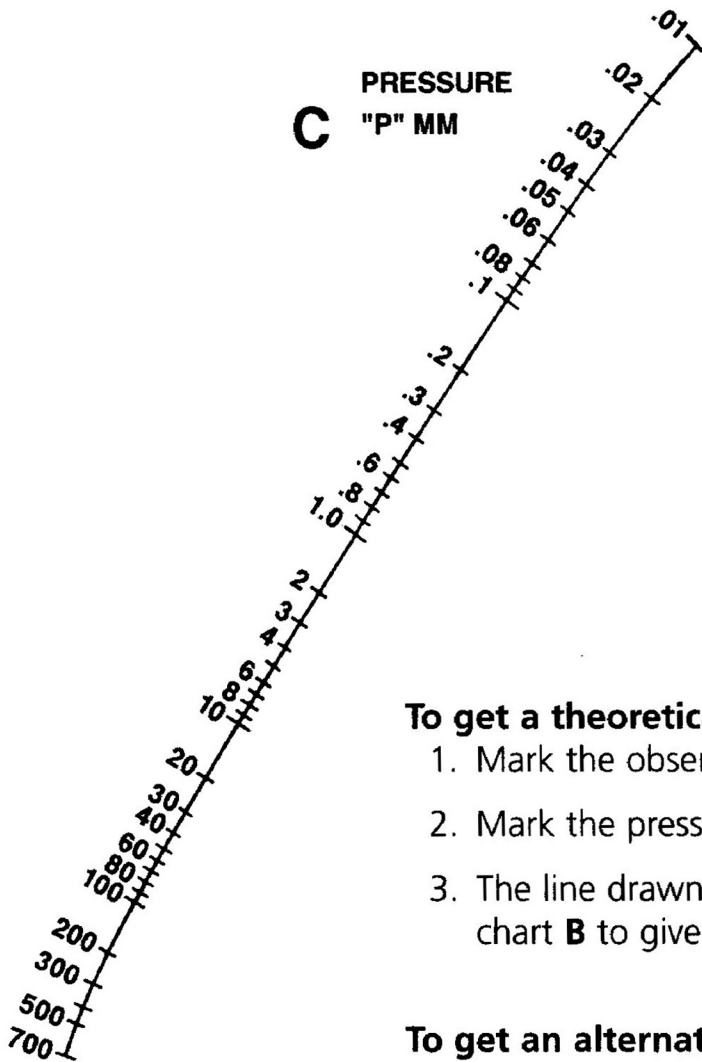

**A** OBSERVED  
BOILING POINT  
AT P. MM

**B** BOILING POINT  
CORRECTED  
TO 760 MM

**C** PRESSURE  
"P" MM

## To get a theoretical bp @ 760 mm:

1. Mark the observed boiling point on chart **A**.
2. Mark the pressure on chart **C**.
3. The line drawn from point **A** to **C** intersects chart **B** to give the theoretical bp at 760 mm.

## To get an alternative bp/pressure:

4. Line up point **B** figured in step 3 with another pressure (chart **C**).
5. Extend the line **BC** through chart **A** to approximate the corresponding bp.
